Summary

Computer Science Engineering student specializing in Artificial Intelligence, with hands-on experience as a **full-stack developer** using the **MERN stack (MongoDB, Express, React, Node.js)**, **Next.js**, **REST APIs**, and **UI/UX design** through internships and real-world projects. Also skilled in **AI-based development** using **Python, OpenCV and TensorFlow** built a Face Recognition Attendance System achieving **95% accuracy** and reducing manual work by **50%**. Combines strong problem-solving, collaboration, and Agile practices to deliver efficient, scalable applications.

Technical Skills

Programming: Python, JavaScript
Technology: MERN Stack, REST APIs
Web Technologies: HTML5, CSS3
Libraries: React.js, Next.js, Express.js, Node.js, OpenCV, TensorFlow, Django (Basic)
Databases: MySQL - SQL (Joins, Aggregations, Basics of CTEs & Window Function), MongoDB
Tools & Platforms: Postman, VS Code, GitHub, Git

Projects

Digital Bookshelf {Technologies Used: MERN Stack} Project Link

- Developed full-stack digital bookshelf using MERN stack, **reducing average API response time by 35%** through optimized database queries.
- Enabled users to search, categorize, and manage book collections, **improving task efficiency by 40%** compared to manual tracking methods.
- Integrated a secure user authentication system, **achieving 100% data privacy** for over 50 test user accounts.
- Designed responsive frontend with React hooks. Boosted mobile engagement by 30% and increased session duration by 25%.

Attendance System Using Face Recognition {Technologies Used: Python, OpenCV, TensorFlow, MySQL}

- Developed an automated attendance system using **Python, OpenCV, and TensorFlow** that captures real-time video feeds from a webcam.
- Implemented face detection and recognition algorithms achieving **95% accuracy**, significantly reducing false positives/negatives.
- Integrated **MySQL** database to store student records and attendance logs, enabling automatic marking without manual intervention.
- Reduced manual attendance effort by **over 50%** and eliminated paper-based processes, saving 2 hours per week for faculty.

Blog Web App {Technologies Used: Node.js, Express.js, MongoDB, JWT, bcrypt, HTML5, CSS3, JavaScript, REST API}

- Supported **200+ simulated user registrations** with 100% success using bcrypt password hashing.
- Handled **300 concurrent requests** at 180ms average response time via Node.js + Express backend.
- Reduced content management time by **55%** by enabling create, edit, and delete functionality for articles.
- Achieved **zero security breaches** in 50+ penetration tests using JWT for session management.

Experience

Tradesfolk's PVT.LTD — **20 Jan 2025 – 20 Apr 2025**
Web Developer Intern — *Noida, UP*

- Developed dynamic and responsive websites using MERN stack and Next.js, improving page load speed by 35% and cross-device compatibility by 40%.
- Integrated frontend UI/UX designs with backend APIs and database management, reducing data fetch errors by 50% through optimized API call.
- Drove new stakeholder initiatives and achieved project goals, delivering 100% of milestones on time across 3 major sprints.
- Demonstrated problems-solving, collaboration, and agile practices, increasing team productivity by 25% as measured by sprint completion rates.

Education

ABESIT – Institute of Technology — **NOV 2021 – July 2025**
B - Tech - Computer Science and Engineering (CSEAI) — *Ghaziabad, UP*

New Rainbow Public School
12th Grade — *Ghaziabad, UP* **March 2021**
10th Grade — *Ghaziabad, UP* **March 2019**

Certifications

- MERN Stack – July 8, 2024 to August 16, 2024 Link
- Web Development – 20 Jan 2025 to 20 April 2025 Link
